**Küçük detaylar büyük farklar yaratır**

Kapak ve sap arasındaki ekstra boşluk sıcak kapağa temas etmeden tutma kolaylığı sağlar.  
Güvenli bir pişirme deneyimi yaratır.

**Small details make big differences**

The extra space between the handle and the lid allows the chef's hands to fit comfortably without touching the hot lid.  
Creating a safer cooking experience.

## Patentli Rezistanslı Camlar / Patented Heated Glasses

- Dünyada bir ilk! Buğu yapmayan rezistanslı camlar sayesinde artık yemekler kapaklar açılmadan da görülebilir. Gıdaların ısını ve hijyenini bu sayede daha uzun süre muhafaza eder.
- Rezistanslı camlar aynı zamanda su damlalarının toplanıp yemeklere damlamasını önler.
- Ortadan ısınmaya başlayan rezistanslı camlar enerji tasarrufu sağlar.
- Farklı renk ve görünümde paslanmaz çelik aksamlar açık büfelere yepyeni bir tarz katar.
- Temperli cam üzerindeki özel ızalasyon sayesinde elektrik ve su buharı arasında kısa devre oluşmasını engeller.
- Özel tasarım hidrolik menteşeler kapağın yavaşça kapanmasına yardımcı olur.
- Farklı renk alternatifleri ile otelinizin tasarımına uyum sağlar.
- Tüm parçalar çıkarılabilir ve makinada yıkanabilir.

- A first in the world! Thanks to the anti-fog resistant glasses, the dishes can now be seen without opening the lids. In this way, the temperature and hygiene of the food can be preserved for a longer period of time.
- Resistance glasses also prevent water droplets from collecting and dripping onto the food.
- Resistive glasses that start to heat from the middle save energy.
- Stainless steel components in different colors and appearances add a brand new style to open buffets.
- Thanks to the special insulation on the tempered glass, short circuit between electricity and water vapor is prevented.
- Specially designed hydraulic hinges help the lid to close slowly.
- It adapts to the design of your hotel with different color alternatives.
- All parts are removable and machine washable
